React to an Improvised Explosive Device (IED) Attack (UNCLASSIFIED / FOR OFFICIAL USE ONLY) (U//FOUO)

Status: Approved

DISTRIBUTION RESTRICTION: Distribution authorized to U.S. Government agencies only.

DESTRUCTION NOTICE: Destroy by any method that will prevent disclosure of contents or reconstruction of the document

Condition: Given an element conducting a mounted/dismounted military operation when an IED, Vehicle-Borne Improvised Explosive Device (VBIED), Suicide Vehicle-Borne Improvised Explosive Device (SVBIED), or Person-Borne Improvised Explosive Device (PBIED) detonates. The element has all available equipment, personnel, current Rules of Engagement (ROE), Escalation of Force (EOF) measures, current theater Security Agreement (SA) if applicable, a 9 line IED/UXO Report and Higher Headquarters (HQ) mission instructions. The personnel of the element have already received a theater-level explosive ordnance briefing. Some iterations of this task should be performed in MOPP.

Standard: React to the IED attack by directing the element to perform the 5/25/200 meter checks, use 5-Cs (Check, Confirm, Clear, Cordon, Control), suppress any enemy fire, set up security, transport any casualties, recover any disabled vehicles, submit a 9 line IED/UXO Report, and exit the area.

Performance Steps

1. React to an IED attack while maintaining movement.

NOTE: An IED is just one part of an ambush and a form of contact with the enemy. Once the IED detonates, the enemy may attack with small arms fire, Rocket Propelled Grenades, and/or secondary IEDs. The enemy may have mortars and rockets zeroed in on the IED kill zone or suspected safe area. The patrol must be ready to react to any threat after the IED detonates. The use of smoke will mitigate enemy sniper effects when maneuvering, recovering vehicles, or evacuating injured personnel.

a. Report the IED attack to the element members using the 3 Ds (distance, direction, and description). (refer to task 052-192-1270)

b. Establish 360 degree security by instructing element members to scan their sectors, suppressing enemy fire as required.

(1) Assess the situation, determine appropriate course of action (COA), and issue instructions to subordinates.

(2) Send initial SITREP to higher headquarters.

Note: The convoy leader should submit a request for casualty/medical evacuation (CASEVAC/MEDEVAC) as soon as there is an indication of a serious casualty. If a treatment facility/forward operating base (FOB) is not within proximity, do not wait until you have reached the rally point before sending the request. A specific grid can be transmitted later. If possible, establish the landing zone (LZ) away from the IED site to prevent the enemy from targeting first responders with a secondary IED or ambush.

c. Employ tactical combat casualty care measures.

d. Direct the element to the rally point if necessary, based on Mission, Enemy, Terrain and weather, Troops and support available, Time available, and Civil considerations (METT-TC) factors.

e. Evacuate any casualties while minimizing exposure to hostile threats.

f. Conduct consolidation and reorganization at the rally point.

g. Direct the element members to report the status of Liquids, Ammunition, Casualties and Equipment (LACE).

h. Continue the mission if applicable.

2. React to an IED attack while dismounted.

a. Report the IED attack to the element using the 3 Ds (distance, direction, and description).

(1) Have personnel in any disabled vehicles dismount on the noncontact side of the vehicle and lay down suppressive fire.

(2) Have nondisabled vehicles moved out of the kill zone. Direct any personnel with a target in their sector to suppress enemy fire.

b. Establish 360 degree security by instructing element members to perform 5/25/200 meter checks (pushing out further if needed) and scan for any additional IED threats or enemy activity. (refer to task 052-192-1270)

DANGER

IF THE SQUAD CANNOT ACHIEVE FIRE SUPERIORITY OVER THE ENEMY, THE SQUAD LEADER MUST DECIDE WHETHER TO BREAK CONTACT OR TO STAY IN PLACE UNTIL REINFORCEMENTS ARRIVE.

(1) Destroy any remaining enemy resistance.

c. Conduct the 5 Cs (Check, Confirm, Clear, Cordon, and Control). (refer to task 052-192-1270)

(1) Assess the situation, determine appropriate COA, and issue instructions to subordinates. If the element cannot achieve fire superiority over the enemy, the leadership must decide whether to break contact or to stay in place until reinforcements arrive.

(2) Send initial SITREP to higher headquarters.

WARNING

ENSURE THAT THE ELEMENT MAINTAINS SITUATIONAL AWARENESS DURING THE ASSAULT AND IS AWARE OF BEING CANALIZED OR STEERED INTO AN UNFAVORABLE POSITION, OR OTHER POSSIBLE IEDS. LEADERSHIP MUST BE AWARE OF EVER CHANGING ENEMY AMBUSH TTP, THE USE OF SMOKE WILL MITIGATE ENEMY SNIPER EFFECTS WHEN MANEUVERING OR EVACUATING INJURED PERSONNEL.

d. Assault through enemy attack if the situation allows, and destroy enemy resistance using fire and maneuver techniques as required.

e. Clear to and secure casualties.

(1) Check for secondary/tertiary IEDs while moving to secure casualties.

(2) Establish a safe area around the casualties prior to treatment and evacuation.

f. Send a report to higher HQ.

g. Employ tactical combat casualty care measures. (refer to task 081-831-1001)

h. Evacuate any casualties to the LZ while minimizing exposure to hostile threats.

Note: The leadership should submit a request for casualty/medical evacuation (CASEVAC/MEDEVAC) as soon as there is an indication of a serious casualty. If a treatment facility/forward operating base (FOB) is not within proximity, do not wait until you have reached the rally point before sending the request. A specific grid can be transmitted later. If possible, establish the landing zone (LZ) away from the IED site to prevent the enemy from targeting first responders with a secondary IED or ambush.

i. Conduct consolidation and reorganization.

j. Direct the element members to report the status of Liquid, Ammunition, Casualties, and Equipment (LACE).

k. Evacuate any casualties while minimizing exposure to hostile threats.

l. Direct element movement to the rally point applying METT-TC.

m. Send an updated SITREP and 9 line IED/UXO report to higher HQ. (refer to task 052-192-1270)

n. Continue the mission if applicable.

(1) Designate one portion of the squad to continue suppressing enemy fire and another portion to assault the enemy position from the flank using METT-TC factors.

(2) Ensure that the element is alert and conducts the 5/25/200 meter checks while scanning for any additional IED threats or enemy activity.

(3) Shift suppressive fires when the assault element closes on the enemy position.

DANGER

YOUR REACTION TO AN IED ATTACK DEPENDS UPON WHETHER OR NOT THERE ARE CASUALTIES. YOU WOULD NORMALLY MOVE OUT OF THE KILL ZONE IMMEDIATELY, BUT CASUALTIES MAY FORCE YOU TO STAY IN THE AREA UNTIL CASUALTY EVACUATION (CASEVAC) IS COMPLETED. IT IS CRITICAL THAT THE SQUAD MOVE OUT OF THE AMBUSH SITE AS SOON AS POSSIBLE TO AVOID ANY MORE ATTACKS BY ENEMY FOLLOW-ON FORCES.

(4) Destroy any remaining enemy resistance.

o. Establish 360-degree security by having element members scan their individual sectors.

p. Ensure that the element is alert and scanning for any additional IEDs (secondary static IEDs, VBIEDs, or PBIEDs) or enemy attacks.

q. Direct element movement to the rally point.

r. Continue the mission.

(Asterisks indicates a leader performance step.)

Evaluation Preparation: Setup: Provide the Soldier a squad-size element in a realistic training environment with IED simulators or training aids.

Brief Soldier: Tell the Soldier to react to the IED attack by directing the squad to suppress any enemy fire, set up security, transport any casualties, recover any disabled vehicles, and exit the area.

Environment: Environmental protection is a continual process. Always be alert to ways to protect our environment and reduce waste.

Safety: In a training environment, leaders must perform a risk assessment in accordance with FM 5-19, Composite Risk Management. Leaders will complete a DA Form 7566 COMPOSITE RISK MANAGEMENT WORKSHEET during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, NBC Protection, FM 3-11.5, CBRN Decontamination. Everyone is responsible for safety. A thorough risk assessment must be completed prior to every mission or operation.
